PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/586,428	Applicant(s) TEWES ET AL.	
	Examiner John Kreck	Art Unit 3672	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

The preliminary claim amendment is entered.

The substitute specification is entered.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the spray device (claims 7,8,13,14) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Krekeler U.S. Patent number 4,337,980. See figure 8a.
2. Claims 1, 9, 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by U.S. Patent number 5,529,384 to Ojanen. See figure 4, 7, and 6.
3. Claims 1-6, 9 are rejected under 35 U.S.C. 102(b) as being anticipated by WO02/090717.

See figure 4, 5, and 12. This reference describes the tool holder arrangement including holder (5) with receiver (52) in a holding neck (51); chisel insertion opening; fastening side with fastening neck (13); and the holding neck having an opening (near 60 and/or 141—see figures 5 and 12) as required by claim 1.

Also described is the through bore (e.g. figure 5) as called for in claim 2.

Regarding claim 4: the delimitation faces shown (e.g. figures 5 and 7—near or at #12) meet the limitation of the distance from each other which is equal to the bore diameter; AND the limitation of the angle with respect to each other of less than 180° (a 0° angle is apparent).

Regarding claim 6: the holder is 1—see figure 5 and 2.

Regarding claim 10: the delimitation faces shown (e.g. figures 5 and 7—near or at #12) meet the limitation of the distance from each other which is equal to the bore diameter; AND the limitation of the angle with respect to each other of less than 180° (a 0° angle is apparent).

Regarding claim 12: the holder is 1—see figure 5 and 2.

4. Claims 7, 8, 13, and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

U.S. Patent number 5,738,415 describes a device which introduces liquid into the bore (figure 4) U.S. Patent number 6,257,672 describes a spray device assigned to chisel holder 4. The prior art fails to disclose or suggest the spray device assigned to the holder which introduces liquid into the chisel receiver through the opening as required by claims 7 and 13.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Kreck whose telephone number is 571-272-7042. The examiner can normally be reached on Mon-Fri 6am-3pm.
